• Shahdol, MP

Summary

To contribute as a Python Developer intern by building and improving backend components, data processing pipelines, and internal tools, while strengthening my understanding of secure, maintainable, and scalable systems.

Experience

Global Alumni Cell - Maulana Azad National Institute of Technology Bhopal 06/2025 - 07/2025

- Completed a one-month offline internship in Machine Learning under the mentorship of Dr. Jitendra Adhikari at NIT Bhopal from June 1, 2025, to June 30, 2025.
- Gained hands-on experience in the fundamentals of machine learning, worked on practical applications, and enhanced my understanding of data-driven problem-solving under expert guidance.

Global skill park 01/2025

- Assisted with event organization and participant engagement during Microsoft Orientation Hackathon; recognized with a hamper for contributions as a volunteer.

Education

Oriental Institute of Science and Technology 09/2023 - 07/2027

Bachelor of Technology (B.Tech) in Data Science

- Developed strong proficiency in object-oriented programming and data structures through hands-on projects.
- Gained practical understanding of databases, operating systems, and applied data analysis and image processing concepts.

Projects

Web_Threat_Analysis_Cyber_Security

- Implements web threat analysis using both machine learning and deep learning approaches.
- Uses multiple libraries for data preprocessing, model building, and performance evaluation.
- Targets detection of malware, phishing, and other web-based cybersecurity threats.
- Provides a robust framework for identifying and mitigating online risks.
- Focuses on improving accuracy and reliability in threat detection systems.

LexiBot

- Built a Django-based AI assistant for legal document analysis, contract interpretation, and multilingual question answering.
- Integrated OCR and speech-to-text pipelines for document ingestion and user interaction.
- Designed backend workflows for request handling, data processing, and response generation with a modern UI/UX.

Climate Change Modeling

- Performed climate data analysis, feature engineering, and model evaluation using Python and Jupyter Notebook.
- Built predictive models to understand trends in climate variables.
- Visualized complex datasets to extract actionable insights.
- Tech: Python, pandas, NumPy, Matplotlib/Seaborn, scikit-learn

Skills

- Programming Languages: Python, SQL
- Machine Learning: scikit-learn, TensorFlow (basic), PyTorch (basic)
- Tools: Jupyter Notebook, VS Code, GitHub
- Soft Skills: Critical Thinking, Storytelling with Data, Team Collaboration
